Observe the following instructions to avoid damage to the equipment:
1. Do not use the equipment in a hazardous environment.
2. Do not use the equipment in a flammable or explosive atmosphere.
3. Do not use the equipment in a corrosive or toxic atmosphere.
4. Do not use the equipment in a high-voltage or high-current environment.
5. Do not use the equipment in a high-temperature or high-humidity environment.
6. Do not use the equipment in a low-oxygen or low-pressure environment.
7. Do not use the equipment in a high-vibration or high-shock environment.
8. Do not use the equipment in a high-magnetic-field environment.
9. Do not use the equipment in a high-electromagnetic-interference environment.
10. Do not use the equipment in a high-radiation environment.
11. Do not use the equipment in a high-sound-pressure-level environment.
12. Do not use the equipment in a high-velocity environment.
13. Do not use the equipment in a high-acceleration environment.
14. Do not use the equipment in a high-g environment.
15. Do not use the equipment in a high-jerk environment.
16. Do not use the equipment in a high-impact environment.
17. Do not use the equipment in a high-torque environment.
18. Do not use the equipment in a high-force environment.
19. Do not use the equipment in a high-moment environment.
20. Do not use the equipment in a high-energy environment.
21. Do not use the equipment in a high-power environment.
22. Do not use the equipment in a high-frequency environment.
23. Do not use the equipment in a high-speed environment.
24. Do not use the equipment in a high-precision environment.
25. Do not use the equipment in a high-accuracy environment.
26. Do not use the equipment in a high-resolution environment.
27. Do not use the equipment in a high-contrast environment.
28. Do not use the equipment in a high-saturation environment.
29. Do not use the equipment in a high-brightness environment.
30. Do not use the equipment in a high-contrast environment.

警告：必须将接地端子接上避雷针。
Caution: For lightning protection, the equipment must be connected to a lightning arrester to the earth using a #6 or above wire.
